Journal of the National Institute of Public Health
Instructions for authors / General guide to JNIPH

Objective of publishing the "Journal of the National Institute of Public Health"

The "Journal of the National Institute of Public Health" is published 6 times a year to promptly cover up-to-date topics in the field of public health; including health, health care, social care and environmental health, and to transmit evidence-based accurate knowledge and information to healthcare professionals.

History of the “Journal of the National Institute of Public Health”

The “Journal of the National Institute of Public Health” was founded in 1951, at which time it was called “Bulletin of the Institute of Public Health”; the name was changed to “Journal of the National Institute of Public Health.” This is the only traditional academic journal that accepts submissions from the wide field of public health in Japan.

I. Submission guidelines

1. Research fields covered by the "Journal of the National Institute of Public Health"
   The "Journal of the National Institute of Public Health" publishes articles on subjects in the field of public health, including health, health care, social care and environmental health.
   The intended readers are the staff of local governments, universities and research institutions, such as professional engineers and researchers engaged in health, health care, social care, environmental health, etc., and those who expect to be engaged in these occupations in the future.

2. Qualifications for submission
   Anyone can submit an article.

3. Content of articles
   The contents of the articles should be related to research fields covered by the "Journal of the National Institute of Public Health," and articles should not have been published or been submitted to other academic journals.

4. Language of articles
   Manuscripts can be written in Japanese and English. If your manuscript is written in Japanese, please provide the title, author names, affiliations, abstract, keywords and references in English. If your manuscript is written in English, please provide the title, author names, affiliations, abstract and keywords in Japanese.

5. Categories of articles
   The following 9 categories of articles are published.
   (1) Original Articles (peer-reviewed)
       Articles on surveys/studies in research fields covered by the "Journal of the National Institute of Public Health,” which should have originality/novelty, and contain scientifically valuable findings or conclusions [up to 10 printed pages]
   (2) Research Data (peer-reviewed)
       Articles written in free format describing significant surveys/statistics from the standpoint of public health [up to 8 printed pages]
   (3) Reviews (peer-reviewed)
       Articles that summarize and systematize or interpret previous findings and research results in the fields covered by the "Journal of the National Institute of Public Health” [up to 12 printed pages]
   (4) Brief Reports (peer-reviewed)
       Articles briefs than original articles, with some new findings, such as preliminary reports [up to 5 printed pages]
   (5) Practice Reports (peer-reviewed)
Articles with findings obtained through practice, education, research or other activities related to the research fields covered by the "Journal of the National Institute of Public Health" conducted in Japan or other countries, which are helpful when other communities or organizations perform similar activities [up to 5 printed pages]

(6) Commentaries (peer-reviewed)
Experts’ opinions, proposals or suggestions on activities, policies or trends in research fields covered by the "Journal of the National Institute of Public Health" [up to 5 printed pages]

(7) Notes (non-peer-reviewed)
Comprehensive commentaries on the activities, policy trends, advances, problems, perspectives, etc., in the research fields covered by the "Journal of the National Institute of Public Health," with references [up to 12 printed pages]

(8) Letters (non-peer-reviewed)
Opinions on published articles and timely reports in research fields covered by the "Journal of the National Institute of Public Health" in Japan or other countries [up to 2 printed pages]

(9) Book Reviews (non-peer-reviewed)
Articles describing impressions/opinions about books in research fields covered by the "Journal of the National Institute of Public Health" from the standpoint of experts; articles considered to serve as advertisements to boost the books' sales shall not be published. [up to 1 printed page]
*One printed page basically corresponds to 2600 characters or 850 English words. Manuscripts exceeding the maximum number of pages may be published.

6. Manuscript submission instructions
(1) Research involving human subjects should be conducted in compliance with scientific and ethical standards according to the Declaration of Helsinki, “ethical guidelines for clinical research,” “ethical guidelines for epidemiological research,” etc. If you had obtained approval from the ethics committee or a similar body of your institution, this should be described accordingly.
(2) Research articles involving animals should describe that the research was conducted according to the guidelines for the management and use of experimental animals prescribed by your institution.
(3) The format of the articles should conform to the Instructions for Authors below. Articles not conforming to the instructions will not be accepted, in principle.

7. Copyright and internet publication
(1) Copyright of all submitted articles shall belong to the National Institute of Public Health. When all or a part of an article is to be used in other journals, etc., in a manner of more than mere citation, approval must be obtained from the editorial board of the journal.
(2) If the content of an article published in the journal is found to infringe the copyright of a third party, the responsibility shall fall on the authors.
(3) The full texts of articles published in the journal are digitized and published on the website of the National Institute of Public Health and J-Stage.

8. Review for publication
The acceptance of manuscripts for publication shall be determined by the editorial board through peer review by 2 or more experts. If your manuscript is returned for revision or other reasons by the editorial board, you should send the revised manuscript back to the editorial board within 1 month. If the revised manuscript is returned after the 1-month period, it may be considered as a new submission. For articles in categories (7), (8) and (9) shown in 5, the acceptance of manuscripts shall be determined by the editorial board.

9. Fee for publication
There is no fee for submission or publication. Regarding reprint fees, after acceptance of your manuscript, you should contact the secretariat of the editorial board of the "Journal of the National Institute of Public Health" and directly pay the fees to the printer.
II. Instructions for authors

1. Submission
Manuscripts should be sent by e-mail to jniph@niph.go.jp. Be sure to attach an application for submission when submitting your manuscript. The applicant should sign the application for submission.

2. Manuscript preparation
Manuscripts should be prepared on personal computers and printed horizontally on A4 paper, with each page containing 25 lines of 35 characters each. Japanese manuscripts should be written in modern kana orthography using Joyo kanji, with foreign personal names, place names, scientific names and compound names written in half-width English characters. However, well-known words may be written in katakana (full-width). The international system of units (SI) should be used, unless there is any specific reason not to. It is desirable to give line numbers in the margin to make the manuscript review smooth (use the help function of a word processing software for how to show line numbers on your manuscript).

3. Manuscript structure
The structure for original articles is shown below, and other categories of articles should be structured by reference to it.
The first page should be a cover page, the second and third page should contain a Japanese and an English abstract, and subsequent pages should contain the text. The text should consist of Introduction, Materials and Methods (or Methods alone), Results, Discussion, Acknowledgement, References (the above heading words can be changed), Tables, Figure Titles and Legends, and Figures or Photographs, in that order.

4. Cover page
The cover page should contain the title of the manuscript, authors’ names, affiliations, contact addresses (including Fax numbers and e-mail addresses), number of figures and tables, and address to which reprint requests should be sent. Consecutive page numbers should be given, with page 1 on the cover page.

5. Abstract and keywords
The second page should contain a Japanese abstract. The title of the manuscript, authors’ names, affiliations, the text of the abstract (up to 1000 characters), and keywords should be given, in that order. Three to 5 keywords in Japanese should be provided. Abstracts of original articles should be structured under the following headings: Objectives, Methods, Results and Conclusion, in that order.
The third page should contain an English abstract. The title of the manuscript, authors’ names, affiliations, the text of the abstract (up to 400 words), and keywords should be given, in that order, in English. Three to 5 keywords in English should be provided. Abstracts of original articles should be structured, in order, under the following headings: Objectives, Methods, Results and Conclusion, in that order. It is desirable that the English of the manuscript be checked by experts with sufficient knowledge of English. Regardless of whether the English language usage in the manuscript has been checked or not, it may be checked before printing after acceptance of the manuscript, at the discretion of the editorial board.

6. Disclosure of information on conflicts of interest (COI)
All interests (such as financial and personal relationships) that may lead to bias in the process of research implementation, manuscript preparation, etc., should be disclosed.
(1) In the case of absence of COI
<An example of description>
There is no conflict of interest to disclose in relation to submission of this manuscript.
(2) In the case of presence of COI
If there is the following COI, names of relevant companies/organizations should be provided. Direct or indirect financial support from particular companies for the process of research implementation, manuscript preparation,
etc., if any, should be described in the article.

<An example of description>
The cost of this study was paid by XX Co., Ltd.

7. Clinical/observational epidemiological studies
Clinical studies should conform to the International Committee of Medical Journal Editors (http://www.icmje.org/) or listed on the clinical study (trial) portal site of the National Institute of Public Health (https://rctportal.nih.go.jp/). It is desirable that the methods adopted for clinical/observational epidemiological studies be in accordance with the “Consolidated Standards of Reporting Trials (CONSORT)” statement (http://www.consort-statement.org), the “Strengthening the Reporting of Observational Studies in Epidemiology (STROBE)” statement (https://www.strobe-statement.org), etc.

8. Figures, tables and photographs
In original articles, characters, numerals and titles in figures (including photographs) and tables should be in Japanese or English. Figures and tables should be inserted into the text, or each figure and table should be printed on a separate sheet of paper. Numbers should be given to figures and tables (e.g., Figure 1 and Table 1) and titles adequately reflecting the content should be indicated. If figures and tables are printed on separate sheets of paper, you should indicate in the manuscript or its margin where the figures and tables should be inserted in the text. Electronic files of figures should be stored in formats such as docx, xlsx, pptx, and jpg. Photographs should have a resolution of at least 350 dpi and figures with characters should have a resolution of at least 600 dpi.

9. Description of references
Reference numbers should be given in square brackets ([ ]) where applicable, and references should be listed at the end of the text in the order of the citations.
Example 1: According to Sakai et al. [1], -------
Example 2: It was reported that ------- [2].
1) Symbols (such as . ; :) should be used properly and carefully.
2) Half-width alphanumeric characters should be used.
3) Full-width symbols (such as . ; :) should be used in Japanese sentences, while half-width symbols should be used in other languages.
4) The semicolon (;) before a volume number and colon (:) before page numbers should not be followed by a space.
Only published studies and manuscripts accepted for publication can be cited as references. Unpublished data and personal information should not be cited. Abbreviated names of international journals adopted by Journals in National Center for Biotechnology Information (NCBI) Databases in PubMed (US National Library of Medicine, National Institutes of Health) or abbreviations in accordance with them should be used. A period “.” should not be used after an abbreviated journal name. The first and last page numbers should not be abbreviated. See the following examples.
For Japanese references, information should be provided in English as well.

[1] An example of a Japanese reference
*For a Japanese reference, the English title should be given in [ ], followed by (in Japanese).

阪東夏子. 社会福祉施設の環境衛生管理. ビルと環境. 2015;150:31-37.
Bando M. [Shakai fukushi shisetsu no kankyo eisei kanri]. Biru to Kankyo. 2015;150:31-37. (in Japanese)
*If the English title is unknown, the Japanese title should be given in [ ] in Roman letters, followed by (in Japanese). Author names should also be given in Roman letters.

*For an “Epub ahead of print” article, the Epub date and digital object identifier (doi), if any, should be given.

[4] An example of an English reference published only in Epub

*A reference published only in Epub; Epub date and doi, if any, should be given.

10. Supplemental information

If figures, tables or other data exceeding the maximum number of pages need to be presented, supplemental information in an electronic file can be attached to the manuscript. The supplemental information shall also be peer-reviewed. The supplemental information shall not be printed, but its existence shall be described in the printed article, and it shall be published on the website in a browsable format (titled, such as “Supplemental Information 1. Original Questionnaire Forms” and “Table S1, Detailed Data on the Subjects”).

11. Permission for reproduction

If figures, tables or sentences over approximately 500 characters (200 English words) are reproduced, the source must be indicated. If the reference is a book, written permission for reproduction must be obtained from the author as well as the publisher.

(Revised on 27th February, 2019)
